SUBJECT INDEX

Abdominal injury
Low-velocity gunshot injuries of the spine with abdominal viscus trauma, 514
Abductor muscles
Effects of surgical approaches for acetabular fractures with associated gluteal vascular injury, 78
Absorbable internal fixation
Operative treatment of displaced intra-articular fractures of the calcaneus using absorbable internal fixation: a prospective study of twenty-five fractures, 413
Acetabular fracture
Biomechanical consequences of anterior column fracture of the acetabulum, 547
Cardiac arrest as a result of intraabdominal extravasation of fluid during arthroscopic removal of a loose body from the hip joint of a patient with an acetabular fracture, 294
Consequences of transverse acetabular fracture malreduction on load transmission across the hip joint, 90
Effects of surgical approaches for acetabular fractures with associated gluteal vascular injury, 78
Rotational imaging of complex acetabular fractures, 59
Trochanteric flip osteotomy for cranial extension and muscle protection in acetabular fracture fixation using a Kocher–Langenback approach, 387
Acetabulum
Biomechanical evaluation of a low anterior wall fracture: correlation with the CT subchondral arc, 152
Cardiac arrest as a result of intraabdominal extravasation of fluid during arthroscopic removal of a loose body from the hip joint of a patient with an acetabular fracture, 294
Consequences of transverse acetabular fracture malreduction on load transmission across the hip joint, 90
Percutaneous fixation of the columns of the acetabulum: a new technique, 51
Rotational imaging of complex acetabular fractures, 59
Treatment of chronic osteomyelitis of the acetabulum after hip joint replacement with a glutaeus maximus muscle flap, 528
Acetylsalicylic acid
A comparison of acetylsalicylic acid with low-molecular-weight heparin for prophylaxis of deep-vein thrombosis in outpatients with injuries and immobilizing bandages of the lower limb, 372
Acromioclavicular joint injury
Functional outcome of acromioclavicular joint injury in polytrauma patients, 159
Acromion fracture
Acromion fracture associated with posterior shoulder dislocation, 521
Adolescents
Avascular necrosis of the femoral head as a serious complication following femoral nailing in children and adolescents, 529
Adult respiratory distress syndrome
Influence of primary plate-osteosynthesis of femur fractures on complications in multiple trauma patients with or without thoracic injuries, 528
Mortality in patients with bilateral femoral fractures, 315
Amputation
Ilizarov external fixation in the management of bilateral, highly complex blast injuries of lower extremities: a report of two cases, 442
Vascular compromise and amputation after intramedullary nailing of a tibia fracture, 136
Anesthesia
Patient perception of the ischemic arm block, 518
Ankle fixation
Temporary transarticular external fixation of the knee and ankle, 431
Ankle fracture
Effects of binary decision making on the classification of fractures of the ankle, 280
Ankle fracture–dislocation
An irreducible distal fibula dislocation while in-line skating, 364
Compartment syndrome following ankle fracture–dislocation: a case report, 67
Anterior wall fracture
Biomechanical evaluation of a low anterior wall fracture: correlation with the CT subchondral arc, 152
AO blade plates
Unstable femoral neck fractures in young adults: treatment with the AO 130-degree blade plate, 235
Arthritis
Arthroscopic treatment of septic arthritis. Surgical technique and results, 528
Extensile exposure of comminuted patella fractures using a tibial tubercle osteotomy: results of a new technique, 351
Arthroscopy
Arthroscopic treatment of septic arthritis. Surgical technique and results, 528
Cardiac arrest as a result of intraabdominal extravasation of fluid during arthroscopic removal of a loose body from the hip joint of a patient with an acetabular fracture, 294
Avascular necrosis
Avascular necrosis of the femoral head as a serious complication following femoral nailing in children and adolescents, 529
Unstable femoral neck fractures in young adults: treatment with the AO 130-degree blade plate, 235
Avulsion injury
Inferior epigastric artery avulsion: a fracture table complication, 587

Bier's block
Patient perception of the ischemic arm block, 518
Bilateral femoral fractures
Mortality in patients with bilateral femoral fractures, 315
Bilateral simultaneous rupture
Outcomes following repair of quadriceps tendon ruptures, 273
Binary decision making
Effects of binary decision making on the classification of fractures of the ankle, 280
Biomaterials
Use of an osteoinductive biomaterial (rhOP-1) in healing large segmental bone defects, 407
Biomechanics
Biomechanical comparison of fixation methods in transverse patella fractures, 356
Biomechanical comparison of hybrid external fixators, 496
Biomechanical consequences of anterior column fracture of the acetabulum, 547
Biomechanical evaluation of a low anterior wall fracture: correlation with the CT subchondral arc, 152
Biomechanical evaluation of distal radius fracture stability, 46
Comparison of mechanical loads produced by current intramedullary reamer systems, 531
Consequences of transverse acetabular fracture malreduction on load transmission across the hip joint, 90
Cortical bone blood flow in loose and tight fitting locked unreamed intramedullary nailing: a canine segmental tibia fracture model, 127
Effect of limited and standard reaming on cortical bone blood flow and early strength of union following segmental fracture, 400
Effects of degrees of reaming on healing of segmental fractures in rats, 192
Fracture site motion with Ilizarov and "hybrid" external fixation, 21
Internal fixation of supracondylar femoral fractures: comparative biomechanical performance of the 95-degree blade plate and two retrograde nails, 259
Intramedullary pressure increase for different commercial and experimental reaming systems: an experimental investigation, 540
Mechanical characteristics of eight femoral intramedullary nailing systems, 177
A mechanical comparison of subtrochanteric femur fracture fixation, 324
Mechanical evaluation of a new minimum-contact plate for internal fracture fixation, 382
Optimal location of a single distal interlocking screw in intramedullary nailing of distal third femoral shaft fractures, 267
Predicting the mechanical outcome of femoral neck fractures fixed with cancellous screws: an in vivo study, 27
Bladder entrapment
Bladder incarceration in a traumatic symphysis pubis diastasis treated with external fixation: a case report and review of the literature, 64
Bladder herniation
Bladder incarceration in a traumatic symphysis pubis diastasis treated with external fixation: a case report and review of the literature, 64
Blade plate
Internal fixation of supracondylar femoral fractures: comparative biomechanical performance of the 95-degree blade plate and two retrograde nails, 259
Unstable femoral neck fractures in young adults: treatment with the AO 130-degree blade plate, 235
Blast injury
Ilizarov external fixation in the management of bilateral, highly complex blast injuries of lower extremities: a report of two cases, 442
Blood flow
Cortical bone blood flow in loose and tight fitting locked unreamed intramedullary nailing: a canine segmental tibia fracture model, 127
Effect of limited and standard reaming on cortical bone blood flow and early strength of union following segmental fracture, 400
Effects of degrees of reaming on healing of segmental fractures in rats, 192
Femoral and cruciate blood flow after retrograde femoral reaming: a canine study using laser Doppler flowmetry, 253
Blood perfusion pressure
Effects of limb elevation on abnormally increased intramuscular pressure, blood perfusion pressure, and foot sensation: an experimental study in humans, 343

Blunt trauma
Mortality in patients with bilateral femoral fractures, 315
Bone
Cortical bone blood flow in loose and tight fitting locked unreamed intramedullary nailing: a canine segmental tibia fracture model, 127
Enhancement of bone apposition to stainless steel cortical screws by surface modification using heat treatment: an experimental study, 504
Bone architecture
High pressure pulsatile lavage of contaminated human tibiae: an in vitro study, 479
Bone blood flow
Effect of limited and standard reaming on cortical bone blood flow and early strength of union following segmental fracture, 400
Effects of degrees of reaming on healing of segmental fractures in rats, 192
Femoral and cruciate blood flow after retrograde femoral reaming: a canine study using laser Doppler flowmetry, 253
Bone defects
Use of an osteoinductive biomaterial (rhOP-1) in healing large segmental bone defects, 407
Bone graft substitutes
Use of an osteoinductive biomaterial (rhOP-1) in healing large segmental bone defects, 407
Bone growth
Bone and cartilage formation in an experimental model of distraction osteogenesis, 111
Enhancement of bone apposition to stainless steel cortical screws by surface modification using heat treatment: an experimental study, 504
Bone healing
Capacitively coupled electrical stimulation treatment: results from patients with failed long bone fracture unions, 510
Mechanical evaluation of a new minimum-contact plate for internal fracture fixation, 382
Bone morphogenic proteins
Use of an osteoinductive biomaterial (rhOP-1) in healing large segmental bone defects, 407
Bone plate
Mechanical evaluation of a new minimum-contact plate for internal fracture fixation, 382
Book reviews
Fractures in the Elderly, edited by Kenneth J. Koval and Joseph D. Zuckerman, 449
The Primary Management of Musculoskeletal Trauma, David Seligson and Kurt Voos, 221
Bosworth fracture
An irreducible distal fibula dislocation while in-line skating, 364
Braces
Isolated ulnar shaft fractures treated with functional braces, 420
Braided cable
Biomechanical comparison of fixation methods in transverse patella fractures, 356
Burst fracture
The efficiency of ultrasound guided spinal fracture reposition, 527

Cadaver study
Optimal position for plate fixation of complex fractures of the proximal radius: a cadaver study, 291
Calcaneal fracture
The Essex–Lopresti reduction for calcaneal fractures revisited, 469
Operative treatment of displaced intra-articular fractures of the calcaneus using absorbable internal fixation: a prospective study of twenty-five fractures, 413
Cancellous screws
Predicting the mechanical outcome of femoral neck fractures fixed with cancellous screws: an in vivo study, 27
Cannulated screws
Percutaneous fixation of the columns of the acetabulum: a new technique, 51
Capacitive coupling
Capacitively coupled electrical stimulation treatment: results from patients with failed long bone fracture unions, 510
Cardiac arrest
Cardiac arrest as a result of intraabdominal extravasation of fluid during arthroscopic removal of a loose body from the hip joint of a patient with an acetabular fracture, 294
Carpal bone fracture
Multiple carpal bone fractures in an eleven-year-old, 445
Carpometacarpal dislocation
Volar dislocation of multiple carpometacarpal joints: report of four cases, 523
Cartilage formation
Bone and cartilage formation in an experimental model of distraction osteogenesis, 111
Cast
Biomechanical evaluation of distal radius fracture stability, 46
Protection of the skin during cast removal, 435
Central nervous system injury
Treatment of femur fracture with associated head injury, 38
Cephalomedullary nails
Removal of a broken Synthes proximal spiral blade, 190
Cervical collar
Comparison of the Nebraska collar, a new prototype cervical immobilization collar, with three standard models, 425
Chest trauma
Femur fractures in chest-injured patients: is reaming contraindicated?, 164
Reamed intramedullary femoral nailing after induction of an "ARDS-like" state in sheep: effect on clinically applicable markers of pulmonary function, 169
Children
Avascular necrosis of the femoral head as a serious complication following femoral nailing in children and adolescents, 529
Fractures of the neck of the femur in children, 528
Multiple carpal bone fractures in an eleven-year-old, 445
Prognosis of proximal radius fractures in childhood, 527
Clavicle fracture
Mid-clavicle fractures in adults: end result study after conservative treatment, 572
Closed reduction
Ulnar nerve palsy following fracture of the shaft of the humerus, 363
Cloth gloves
Comparison of cloth gloves used in orthopaedic surgery: a clinical and experimental evaluation, 106
Collagen
Serology of collagen types I and III in normal healing of tibial shaft fractures, 122
Colony-forming units
High pressure pulsatile lavage of contaminated human tibiae: an in vitro study, 479
Comminuted fracture
Extensile exposure of comminuted patella fractures using a tibial tubercle osteotomy: results of a new technique, 351
Use of a hybrid external fixator for a severely comminuted juxta-articular fracture of the distal humerus, 439
Comminution
Biomechanical evaluation of distal radius fracture stability, 46
Use of modified Ilizarov Olive wires as pushing wires, 436
Compartment syndromes
Bilateral ureteral obstruction and renal failure caused by massive retroperitoneal hematoma: is there a pelvic compartment syndrome analogous to abdominal compartment syndrome?, 553
Cardiac arrest as a result of intraabdominal extravasation of fluid during arthroscopic removal of a loose body from the hip joint of a patient with an acetabular fracture, 294
Compartment syndrome following ankle fracture–dislocation: a case report, 67
Secondary wound closure following fasciotomy for acute compartment syndrome increases intramuscular pressure, 117
Complications
Avascular necrosis of the femoral head as a serious complication following femoral nailing in children and adolescents, 529
Functional outcomes of "floating elbow" injuries in adult patients, 284
Inferior epigastric artery avulsion: a fracture table complication, 587
Influence of primary plate-osteosynthesis of femur fractures on complications in multiple trauma patients with or without thoracic injuries, 528
Mechanical complications associated with the use of the unreamed AO femoral intramedullary nail with spiral blade: first experiences with thirty-five consecutive cases, 186
Prognosis of proximal radius fractures in childhood, 527
Treatment of chronic osteomyelitis of the acetabulum after hip joint replacement with a glutaeus maximus muscle flap, 528
Treatment of femur fracture with associated head injury, 38
Compound fracture
High pressure pulsatile lavage of contaminated human tibiae: an in vitro study, 479
Compression hip screw
Dynamic hip screw with trochanteric stabilizing plate in the treatment of unstable proximal femoral fractures: a comparative study with the gamma nail and compression hip screw, 241
Computed tomography
Biomechanical evaluation of a low anterior wall fracture: correlation with the CT subchondral arc, 152
Condylar overgrowth
Screw osteosynthesis of displaced fractures of the radial condyle of the humerus in childhood. A long-term prospective study, 527
Congenital torsion femoral deformity
Mathematical precision in rotational corrective osteotomy of the femur, 360
Conservative treatment
Mid-clavicle fractures in adults: end result study after conservative treatment, 572
Prognosis of proximal radius fractures in childhood, 527
Contact pressure
Biomechanical consequences of anterior column fracture of the acetabulum, 547
Cortical bone
Cortical bone blood flow in loose and tight fitting locked unreamed intramedullary nailing: a canine segmental tibia fracture model, 127
Effect of limited and standard reaming on cortical bone blood flow and early strength of union following segmental fracture, 400
Effects of degrees of reaming on healing of segmental fractures in rats, 192
Cortical screws
Enhancement of bone apposition to stainless steel cortical screws by surface modification using heat treatment: an experimental study, 504
Cost analysis
Skeletal traction versus external fixation for pediatric femoral shaft fractures: a comparison of hospital costs and charges, 563
Cost savings
Office removal of tibial external fixators: an evaluation of cost savings and patient satisfaction, 569
Cranial extension
Trochanteric flip osteotomy for cranial extension and muscle protection in acetabular fracture fixation using a Kocher–Langenback approach, 387
Cruciate blood flow
Femoral and cruciate blood flow after retrograde femoral reaming: a canine study using laser Doppler flowmetry, 253
Cruciate ligaments
Femoral and cruciate blood flow after retrograde femoral reaming: a canine study using laser Doppler flowmetry, 253

Debridement
High pressure pulsatile lavage of contaminated human tibiae: an in vitro study, 479
Treatment of type II, IIIA, and IIIB open fractures of the tibial shaft: a prospective comparison of unreamed interlocking intramedullary nails and half-pin external fixators, 1
Decision making
Effects of binary decision making on the classification of fractures of the ankle, 280
Deep-vein thrombosis
A comparison of acetylsalicylic acid with low-molecular-weight heparin for prophylaxis of deep-vein thrombosis in outpatients with injuries and immobilizing bandages of the lower limb, 372
Deformity
Mathematical precision in rotational corrective osteotomy of the femur, 360
Prevention of malrotation deformity in femoral shaft fracture, 558

Device breakage
Mechanical complications associated with the use of the unreamed AO femoral intramedullary nail with spiral blade: first experiences with thirty-five consecutive cases, 186
Removal of a broken Synthes proximal spiral blade, 190
Diagnosis
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: clinical results, 206
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: histologic correlation using a canine model, 200
Digital rotational angiography
Rotational imaging of complex acetabular fractures, 59
Disability rating
Patient rating of wrist pain and disability: a reliable and valid measurement tool, 577
Dislocation
Acromion fracture associated with posterior shoulder dislocation, 521
An irreducible distal fibula dislocation while in-line skating, 364
Biomechanical consequences of anterior column fracture of the acetabulum, 547
Compartment syndrome following ankle fracture–dislocation: a case report, 67
Dislocation of the distal radioulnar joint associated with an intraarticular fracture of the ulnar head: report of two cases, 68
Functional outcome of acromioclavicular joint injury in polytrauma patients, 159
Irreducible fracture–dislocation of the hip: a severe injury with a poor prognosis, 223
Simultaneous double interphalangeal dislocation in a finger, 70
Volar dislocation of multiple carpometacarpal joints: report of four cases, 523
Displaced intra-articular fractures
Operative treatment of displaced intra-articular fractures of the calcaneus using absorbable internal fixation: a prospective study of twenty-five fractures, 413
Distal aiming device
Experimental study of distal interlocking of a solid tibial nail: radiation-independent distal aiming device (DAD) versus freehand technique (FHT), 373
Distal interlocking screw
Optimal location of a single distal interlocking screw in intramedullary nailing of distal third femoral shaft fractures, 267
Distraction osteogenesis
Bone and cartilage formation in an experimental model of distraction osteogenesis, 111
Drainage tubes
Efficacy of surgical wound drainage in orthopaedic trauma patients: a randomized prospective trial, 348
Dynamic hip screw
Clinical results using the trochanter stabilizing plate (TSP): the modular extension of the dynamic hip screw (DHS) for internal fixation of selected unstable intertrochanteric fractures, 392
Dynamic hip screw with trochanteric stabilizing plate in the treatment of unstable proximal femoral fractures: a comparative study with the gamma nail and compression hip screw, 241

Editorials
An annual event, 451
Meeting address: what is an orthopaedic surgeon in the twenty-first century?, 452
OTA presidential address, 74
The scientific sessions at the OTA annual meeting, 456
Trauma care in Europe before and after John Border: the evolution in trauma management at the University of Hannover, 301
A warm welcome, 73
Elbow injury
Functional outcomes of "floating elbow" injuries in adult patients, 284
Elderly
The retrograde intramedullary nail: prospective experience in patients older than sixty-five years, 330
Electrical stimulation
Capacitively coupled electrical stimulation treatment: results from patients with failed long bone fracture unions, 510
Electromyographic monitoring
Intraoperative stimulus-evoked electromyographic monitoring for placement of iliosacral implants: an animal model, 85
End caps
End caps for the intramedullary nail: a help or a hindrance?, 299
Endochondral ossification
Bone and cartilage formation in an experimental model of distraction osteogenesis, 111
Epigastric artery avulsion
Inferior epigastric artery avulsion: a fracture table complication, 587
Escherichia coli
High pressure pulsatile lavage of contaminated human tibiae: an in vitro study, 479
Essex–Lopresti reduction
The Essex–Lopresti reduction for calcaneal fractures revisited, 469
Experimental analysis
Comparison of different methods of internal fixation of symphyseal disruptions under multidirectional dynamic conditions: an experimental analysis simulating gait conditions, 371
Extensile approach
Effects of surgical approaches for acetabular fractures with associated gluteal vascular injury, 78
External fixation
Biomechanical comparison of hybrid external fixators, 496
Bladder incarceration in a traumatic symphysis pubis diastasis treated with external fixation: a case report and review of the literature, 64
Bone and cartilage formation in an experimental model of distraction osteogenesis, 111
Conversion of osteosynthesis in war fractures, 529
External fixation of tibial plafond fractures: is routine plating of the fibula necessary?, 16
Fracture site motion with Ilizarov and "hybrid" external fixation, 21
Ilizarov external fixation in the management of bilateral, highly complex blast injuries of lower extremities: a report of two cases, 442
Skeletal traction versus external fixation for pediatric femoral shaft fractures: a comparison of hospital costs and charges, 563
Temporary transarticular external fixation of the knee and ankle, 431
Treatment of type II, IIIA, and IIIB open fractures of the tibial shaft: a prospective comparison of unreamed interlocking intramedullary nails and half-pin external fixators, 1
Use of a hybrid external fixator for a severely comminuted juxta-articular fracture of the distal humerus, 439
External fixators
Office removal of tibial external fixators: an evaluation of cost savings and patient satisfaction, 569
Extravasation
Cardiac arrest as a result of intraabdominal extravasation of fluid during arthroscopic removal of a loose body from the hip joint of a patient with an acetabular fracture, 294

Failed bone healing
Capacitively coupled electrical stimulation treatment: results from patients with failed long bone fracture unions, 510
Failed fixation
Predictors of early failure of fixation in the treatment of displaced subcapital hip fractures, 230
Fasciotomy
Secondary wound closure following fasciotomy for acute compartment syndrome increases intramuscular pressure, 117
Fat embolization
Reamed intramedullary femoral nailing after induction of an "ARDS-like" state in sheep: effect on clinically applicable markers of pulmonary function, 169
Femoral fracture
Dynamic hip screw with trochanteric stabilizing plate in the treatment of unstable proximal femoral fractures: a comparative study with the gamma nail and compression hip screw, 241
Femur fractures in chest-injured patients: is reaming contraindicated?, 164
Influence of primary plate-osteosynthesis of femur fractures on complications in multiple trauma patients with or without thoracic injuries, 528
Internal fixation of supracondylar femoral fractures: comparative biomechanical performance of the 95-degree blade plate and two retrograde nails, 259
Intramedullary fixation of high subtrochanteric femoral fractures: a study comparing two implant designs, the gamma nail and the intramedullary hip screw, 249
A mechanical comparison of subtrochanteric femur fracture fixation, 324
Mortality in patients with bilateral femoral fractures, 315
Reamed intramedullary femoral nailing after induction of an "ARDS-like" state in sheep: effect on clinically applicable markers of pulmonary function, 169
Removal of a broken Synthes proximal spiral blade, 190
The retrograde intramedullary nail: prospective experience in patients older than sixty-five years, 330
Retrograde intramedullary nailing of femoral diaphyseal fractures, 464
Retrograde nailing of femoral fractures distal to a Moore prosthesis, 588
Skeletal traction versus external fixation for pediatric femoral shaft fractures: a comparison of hospital costs and charges, 563
Temporary transarticular external fixation of the knee and ankle, 431
Treatment of femur fracture with associated head injury, 38
Unreamed retrograde intramedullary nailing of fractures of the femoral shaft, 334
Femoral head
Avascular necrosis of the femoral head as a serious complication following femoral nailing in children and adolescents, 529
Intraoperative assessment of femoral head vascularity after femoral neck fracture, 474
Femoral nailing
Avascular necrosis of the femoral head as a serious complication following femoral nailing in children and adolescents, 529
Neurologic and vascular structures at risk during anterior-posterior locking of retrograde femoral nails, 379
Femoral neck fracture
Fractures of the neck of the femur in children, 528
Intraoperative assessment of femoral head vascularity after femoral neck fracture, 474
Predicting the mechanical outcome of femoral neck fractures fixed with cancellous screws: an in vivo study, 27
Unstable femoral neck fractures in young adults: treatment with the AO 130-degree blade plate, 235
Utilization of a partially threaded Kirschner wire in the treatment of femoral neck fractures, 320
Femoral reaming
Femoral and cruciate blood flow after retrograde femoral reaming: a canine study using laser Doppler flowmetry, 253
Femoral shaft
Length of operative procedures: reamed femoral intramedullary nailing performed with and without a fracture table, 485
Mathematical precision in rotational corrective osteotomy of the femur, 360
Optimal location of a single distal interlocking screw in intramedullary nailing of distal third femoral shaft fractures, 267
Prevention of malrotation deformity in femoral shaft fracture, 558
Retrograde intramedullary nailing of femoral diaphyseal fractures, 464
Unreamed retrograde intramedullary nailing of fractures of the femoral shaft, 334
Femur
Femoral and cruciate blood flow after retrograde femoral reaming: a canine study using laser Doppler flowmetry, 253
Infections in periarticular fractures of the lower extremity treated with tensioned wire hybrid fixators, 214
Internal fixation of supracondylar femoral fractures: comparative biomechanical performance of the 95-degree blade plate and two retrograde nails, 259
Length of operative procedures: reamed femoral intramedullary nailing performed with and without a fracture table, 485
Mathematical precision in rotational corrective osteotomy of the femur, 360
Mechanical characteristics of eight femoral intramedullary nailing systems, 177
Neurologic and vascular structures at risk during anterior-posterior locking of retrograde femoral nails, 379

Femur *(continued)*
Optimal location of a single distal interlocking screw in intramedullary nailing of distal third femoral shaft fractures, 267
Skeletal traction versus external fixation for pediatric femoral shaft fractures: a comparison of hospital costs and charges, 563
Fibula
External fixation of tibial plafond fractures: is routine plating of the fibula necessary?, 16
Fibula dislocation
An irreducible distal fibula dislocation while in-line skating, 364
Finger
Simultaneous double interphalangeal dislocation in a finger, 70
Volar dislocation of multiple carpometacarpal joints: report of four cases, 523
Fixation
Biomechanical comparison of fixation methods in transverse patella fractures, 356
Biomechanical comparison of hybrid external fixators, 496
Bladder incarceration in a traumatic symphysis pubis diastasis treated with external fixation: a case report and review of the literature, 64
Bone and cartilage formation in an experimental model of distraction osteogenesis, 111
Clinical results using the trochanter stabilizing plate (TSP): the modular extension of the dynamic hip screw (DHS) for internal fixation of selected unstable intertrochanteric fractures, 392

Predicting the mechanical outcome of femoral neck fractures fixed with cancellous screws: an in vivo study, 27
Prevention of malrotation deformity in femoral shaft fracture, 558
Prognosis of proximal radius fractures in childhood, 527
Removal of a broken Synthes proximal spiral blade, 190
The retrograde intramedullary nail: prospective experience in patients older than sixty-five years, 330
Retrograde intramedullary nailing of femoral diaphyseal fractures, 464
Rotational imaging of complex acetabular fractures, 59
Skeletal traction versus external fixation for pediatric femoral shaft fractures: a comparison of hospital costs and charges, 563
Serology of collagen types I and III in normal healing of tibial shaft fractures, 122
Temporary transarticular external fixation of the knee and ankle, 431
Treatment of femur fracture with associated head injury, 38
Treatment of type II, IIIA, and IIIB open fractures of the tibial shaft: a prospective comparison of unreamed interlocking intramedullary nails and half-pin external fixators, 1
Triangular osteosynthesis of vertically unstable sacrum fractures: a new concept allowing early weight-bearing, 307
Ulnar nerve palsy following fracture of the shaft of the humerus, 363
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: clinical results, 206
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: histologic correlation using a canine model, 200
Unreamed retrograde intramedullary nailing of fractures of the femoral shaft, 334
Unstable femoral neck fractures in young adults: treatment with the AO 130-degree blade plate, 235
Use of a hybrid external fixator for a severely comminuted juxta-articular fracture of the distal humerus, 439
Use of modified Ilizarov olive wires as pushing wires, 436
Utilization of a partially threaded Kirschner wire in the treatment of femoral neck fractures, 320
Vascular compromise and amputation after intramedullary nailing of a tibia fracture, 136
Fracture classification
Effects of binary decision making on the classification of fractures of the ankle, 280
Fracture–dislocation
Acromion fracture associated with posterior shoulder dislocation, 521
An irreducible distal fibula dislocation while in-line skating, 364
Biomechanical consequences of anterior column fracture of the acetabulum, 547
Compartment syndrome following ankle fracture–dislocation: a case report, 67
Irreducible fracture–dislocation of the hip: a severe injury with a poor prognosis, 223
Long-term functional prognosis of posterior injuries in high-energy pelvic disruption, 145
Screw osteosynthesis of displaced fractures of the radial condyle of the humerus in childhood. A long-term prospective study, 527
Variant of the Lisfranc fracture–dislocation: a case report and review of the literature, 366
Fracture failure
Predictors of early failure of fixation in the treatment of displaced subcapital hip fractures, 230

Fracture fixation device
Optimal location of a single distal interlocking screw in intramedullary nailing of distal third femoral shaft fractures, 267
Fracture site motion
Fracture site motion with Ilizarov and "hybrid" external fixation, 21
Fracture stability
Biomechanical evaluation of distal radius fracture stability, 46
Fracture table
Inferior epigastric artery avulsion: a fracture table complication, 587
Length of operative procedures: reamed femoral intramedullary nailing performed with and without a fracture table, 485
Fracture, unstable
Dynamic hip screw with trochanteric stabilizing plate in the treatment of unstable proximal femoral fractures: a comparative study with the gamma nail and compression hip screw, 241
Unstable femoral neck fractures in young adults: treatment with the AO 130-degree blade plate, 235
Freehand nailing technique
Experimental study of distal interlocking of a solid tibial nail: radiation-independent distal aiming device (DAD) versus freehand technique (FHT), 373
Functional braces
Isolated ulnar shaft fractures treated with functional braces, 420
Functional outcome
Functional outcome of acromioclavicular joint injury in polytrauma patients, 159
Functional outcomes of "floating elbow" injuries in adult patients, 284
Outcomes following repair of quadriceps tendon ruptures, 273
Retrograde nailing of femoral fractures distal to a Moore prosthesis, 588
Functional prognosis
Long-term functional prognosis of posterior injuries in high-energy pelvic disruption, 145

Gait simulation
Comparison of different methods of internal fixation of symphyseal disruptions under multidirectional dynamic conditions: an experimental analysis simulating gait conditions, 371
Gamma nail
Dynamic hip screw with trochanteric stabilizing plate in the treatment of unstable proximal femoral fractures: a comparative study with the gamma nail and compression hip screw, 241
Intramedullary fixation of high subtrochanteric femoral fractures: a study comparing two implant designs, the gamma nail and the intramedullary hip screw, 249
Geometrical properties
Geometrical properties and torsional fatigue life of a tibial interlocking intramedullary nail segment, 8
Glove liners
Outer gloves in orthopaedic procedures: a polyester/stainless steel wire weave glove liner compared with latex, 101
Gluteal artery injury
Effects of surgical approaches for acetabular fractures with associated gluteal vascular injury, 78
Gluteus maximum muscle flap
Treatment of chronic osteomyelitis of the acetabulum after hip joint replacement with a glutaeus maximus muscle flap, 528
Growth disturbance
Prognosis of proximal radius fractures in childhood, 527
Screw osteosynthesis of displaced fractures of the radial condyle of the humerus in childhood. A long-term prospective study, 527
Gunshot wound
Low-velocity gunshot injuries of the spine with abdominal viscus trauma, 514

Hand trauma
Volar dislocation of multiple carpometacarpal joints: report of four cases, 523
Hawkins sign
Posttraumatic vascular impairment of the talus—is necrosis inevitable?, 529
Head injury
Treatment of femur fracture with associated head injury, 38
Healing
Capacitively coupled electrical stimulation treatment: results from patients with failed long bone fracture unions, 510
Effects of degrees of reaming on healing of segmental fractures in rats, 192
High pressure pulsatile lavage irrigation of intraarticular fractures: effects on fracture healing, 460
Mechanical evaluation of a new minimum-contact plate for internal fracture fixation, 382
Serology of collagen types I and III in normal healing of tibial shaft fractures, 122
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: clinical results, 206
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: histologic correlation using a canine model, 200
Use of an osteoinductive biomaterial (rhOP-1) in healing large segmental bone defects, 407
Heat treatment
Enhancement of bone apposition to stainless steel cortical screws by surface modification using heat treatment: an experimental study, 504
Hemorrhagic shock
The contribution of soft-tissue trauma and/or bone fracture to depressed immunity following hemorrhagic shock in an experimental setting, 371
Heparin
A comparison of acetylsalicylic acid with low-molecular-weight heparin for prophylaxis of deep-vein thrombosis in outpatients with injuries and immobilizing bandages of the lower limb, 372
High pressure pulsatile lavage
High pressure pulsatile lavage irrigation of intraarticular fractures: effects on fracture healing, 460
High pressure pulsatile lavage of contaminated human tibiae: an in vitro study, 479
Hip endoprosthesis
Treatment of chronic osteomyelitis of the acetabulum after hip joint replacement with a glutaeus maximus muscle flap, 528
Hip fracture
Predicting the mechanical outcome of femoral neck fractures fixed with cancellous screws: an in vivo study, 27
Predictors of early failure of fixation in the treatment of displaced subcapital hip fractures, 230
Hip fracture–dislocation
Irreducible fracture–dislocation of the hip: a severe injury with a poor prognosis, 223
Hip joint
Biomechanical evaluation of a low anterior wall fracture: correlation with the CT subchondral arc, 152
Cardiac arrest as a result of intraabdominal extravasation of fluid during arthroscopic removal of a loose body from the hip joint of a patient with an acetabular fracture, 294
Consequences of transverse acetabular fracture malreduction on load transmission across the hip joint, 90
Hip joint replacement
Treatment of chronic osteomyelitis of the acetabulum after hip joint replacement with a glutaeus maximus muscle flap, 528
Hip screw
Dynamic hip screw with trochanteric stabilizing plate in the treatment of unstable proximal femoral fractures: a comparative study with the gamma nail and compression hip screw, 241
Intramedullary fixation of high subtrochanteric femoral fractures: a study comparing two implant designs, the gamma nail and the intramedullary hip screw, 249
Histology
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: histologic correlation using a canine model, 200
Humeral shaft fractures
Intramedullary nailing of humeral shaft fractures, 371
Humeral shaft nonunion
Nonunion of the humerus following intramedullary nailing treated by Ilizarov hybrid fixation, 138
Humerus
Nonunion of the humerus following intramedullary nailing treated by Ilizarov hybrid fixation, 138
Screw osteosynthesis of displaced fractures of the radial condyle of the humerus in childhood. A long-term prospective study, 527
Humerus fracture
Ulnar nerve palsy following fracture of the shaft of the humerus, 363
Use of a hybrid external fixator for a severely comminuted juxta-articular fracture of the distal humerus, 439
Hybrid external fixator
Biomechanical comparison of hybrid external fixators, 496
Use of a hybrid external fixator for a severely comminuted juxta-articular fracture of the distal humerus, 439
Hybrid fixation
Fracture site motion with Ilizarov and "hybrid" external fixation, 21
Infections in periarticular fractures of the lower extremity treated with tensioned wire hybrid fixators, 214
Nonunion of the humerus following intramedullary nailing treated by Ilizarov hybrid fixation, 138

Iliosacral screws
Intraoperative stimulus-evoked electromyographic monitoring for placement of iliosacral implants: an animal model, 85
Ilizarov fixation
Fracture site motion with Ilizarov and "hybrid" external fixation, 21
Ilizarov external fixation in the management of bilateral, highly complex blast injuries of lower extremities: a report of two cases, 442
Nonunion of the humerus following intramedullary nailing treated by Ilizarov hybrid fixation, 138
Use of modified Ilizarov olive wires as pushing wires, 436
Ilizarov hybrid fixator
Nonunion of the humerus following intramedullary nailing treated by Ilizarov hybrid fixation, 138
Imaging
Rotational imaging of complex acetabular fractures, 59
Immobilization collar
Comparison of the Nebraska collar, a new prototype cervical immobilization collar, with three standard models, 425
Immobilizing bandages
A comparison of acetylsalicylic acid with low-molecular-weight heparin for prophylaxis of deep-vein thrombosis in outpatients with injuries and immobilizing bandages of the lower limb, 372
Immunity
The contribution of soft-tissue trauma and/or bone fracture to depressed immunity following hemorrhagic shock in an experimental setting, 371
Implants
Enhancement of bone apposition to stainless steel cortical screws by surface modification using heat treatment: an experimental study, 504
Intramedullary fixation of high subtrochanteric femoral fractures: a study comparing two implant designs, the gamma nail and the intramedullary hip screw, 249
Infection
Arthroscopic treatment of septic arthritis. Surgical technique and results, 528
High pressure pulsatile lavage of contaminated human tibiae: an in vitro study, 479
Infections in periarticular fractures of the lower extremity treated with tensioned wire hybrid fixators, 214
Low-velocity gunshot injuries of the spine with abdominal viscus trauma, 514
Nonunion of the humerus following intramedullary nailing treated by Ilizarov hybrid fixation, 138
In-line skating
An irreducible distal fibula dislocation while in-line skating, 364
Interleukin
The contribution of soft-tissue trauma and/or bone fracture to depressed immunity following hemorrhagic shock in an experimental setting, 371
Interlocking screw
Optimal location of a single distal interlocking screw in intramedullary nailing of distal third femoral shaft fractures, 267
Interlocking tibial nails
Experimental study of distal interlocking of a solid tibial nail: radiation-independent distal aiming device (DAD) versus freehand technique (FHT), 373
Internal fixation
Clinical results using the trochanter stabilizing plate (TSP): the modular extension of the dynamic hip screw (DHS) for internal fixation of selected unstable intertrochanteric fractures, 392

Internal fixation *(continued)*
Comparison of different methods of internal fixation of symphyseal disruptions under multidirectional dynamic conditions: an experimental analysis simulating gait conditions, 371
Extensile exposure of comminuted patella fractures using a tibial tubercle osteotomy: results of a new technique, 351
Internal fixation of supracondylar femoral fractures: comparative biomechanical performance of the 95-degree blade plate and two retrograde nails, 259
Intraoperative assessment of femoral head vascularity after femoral neck fracture, 474
Operative treatment of displaced intra-articular fractures of the calcaneus using absorbable internal fixation: a prospective study of twenty-five fractures, 413
Predicting the mechanical outcome of femoral neck fractures fixed with cancellous screws: an in vivo study, 27
Treatment of type II, IIIA, and IIIB open fractures of the tibial shaft: a prospective comparison of unreamed interlocking intramedullary nails and half-pin external fixators, 1
Unstable femoral neck fractures in young adults: treatment with the AO 130-degree blade plate, 235
Interobserver reliability
Effects of binary decision making on the classification of fractures of the ankle, 280
Interphalangeal dislocation
Simultaneous double interphalangeal dislocation in a finger, 70
Intertrochanteric fractures
Clinical results using the trochanter stabilizing plate (TSP): the modular extension of the dynamic hip screw (DHS) for internal fixation of selected unstable intertrochanteric fractures, 392
Intraabdominal extravasation
Cardiac arrest as a result of intraabdominal extravasation of fluid during arthroscopic removal of a loose body from the hip joint of a patient with an acetabular fracture, 294
Intraarticular fracture
Dislocation of the distal radioulnar joint associated with an intraarticular fracture of the ulnar head: report of two cases, 68
High pressure pulsatile lavage irrigation of intraarticular fractures: effects on fracture healing, 460
Operative treatment of displaced intra-articular fractures of the calcaneus using absorbable internal fixation: a prospective study of twenty-five fractures, 413
Intramedullary fixation
Intramedullary fixation of high subtrochanteric femoral fractures: a study comparing two implant designs, the gamma nail and the intramedullary hip screw, 249
Treatment of type II, IIIA, and IIIB open fractures of the tibial shaft: a prospective comparison of unreamed interlocking intramedullary nails and half-pin external fixators, 1
Intramedullary hip screw
Intramedullary fixation of high subtrochanteric femoral fractures: a study comparing two implant designs, the gamma nail and the intramedullary hip screw, 249
Intramedullary nailing
Comparison of mechanical loads produced by current intramedullary reamer systems, 531
Cortical bone blood flow in loose and tight fitting locked unreamed intramedullary nailing: a canine segmental tibia fracture model, 127
Effects of degrees of reaming on healing of segmental fractures in rats, 192
Experimental study of distal interlocking of a solid tibial nail: radiation-independent distal aiming device (DAD) versus freehand technique (FHT), 373
Femur fractures in chest-injured patients: is reaming contraindicated?, 164
Geometrical properties and torsional fatigue life of a tibial interlocking intramedullary nail segment, 8
Intramedullary fixation of high subtrochanteric femoral fractures: a study comparing two implant designs, the gamma nail and the intramedullary hip screw, 249
Intramedullary nailing of humeral shaft fractures, 371
Intramedullary pressure increase for different commercial and experimental reaming systems: an experimental investigation, 540
Length of operative procedures: reamed femoral intramedullary nailing performed with and without a fracture table, 485
Mechanical characteristics of eight femoral intramedullary nailing systems, 177
Neurologic and vascular structures at risk during anterior-posterior locking of retrograde femoral nails, 379
Nonunion of the humerus following intramedullary nailing treated by Ilizarov hybrid fixation, 138
Optimal location of a single distal interlocking screw in intramedullary nailing of distal third femoral shaft fractures, 267
Prevention of malrotation deformity in femoral shaft fracture, 558
Reamed intramedullary femoral nailing after induction of an "ARDS-like" state in sheep: effect on clinically applicable markers of pulmonary function, 169
The retrograde intramedullary nail: prospective experience in patients older than sixty-five years, 330
Retrograde intramedullary nailing of femoral diaphyseal fractures, 464
Ulnar nerve palsy following fracture of the shaft of the humerus, 363
Unreamed retrograde intramedullary nailing of fractures of the femoral shaft, 334
Vascular compromise and amputation after intramedullary nailing of a tibia fracture, 136
Intramedullary nails
End caps for the intramedullary nail: a help or a hindrance?, 299
Geometrical properties and torsional fatigue life of a tibial interlocking intramedullary nail segment, 8
A mechanical comparison of subtrochanteric femur fracture fixation, 324
Mechanical complications associated with the use of the unreamed AO femoral intramedullary nail with spiral blade: first experiences with thirty-five consecutive cases, 186
The retrograde intramedullary nail: prospective experience in patients older than sixty-five years, 330
Intramedullary pressure
Intramedullary pressure increase for different commercial and experimental reaming systems: an experimental investigation, 540
Intramedullary reaming
Comparison of mechanical loads produced by current intramedullary reamer systems, 531
Intramembranous ossification
Bone and cartilage formation in an experimental model of distraction osteogenesis, 111
Intramuscular pressure
Effects of limb elevation on abnormally increased intramuscular pressure, blood perfusion pressure, and foot sensation: an experimental study in humans, 343
Secondary wound closure following fasciotomy for acute compartment syndrome increases intramuscular pressure, 117
Intraoperative assessment
The efficiency of ultrasound guided spinal fracture reposition, 527
Intraoperative assessment of femoral head vascularity after femoral neck fracture, 474
Intraoperative stimulus-evoked electromyographic monitoring for placement of iliosacral implants: an animal model, 85
Intravenous regional anesthesia
Patient perception of the ischemic arm block, 518
Irreducible distal fibular dislocation
An irreducible distal fibula dislocation while in-line skating, 364
Irreducible fracture–dislocation
Irreducible fracture–dislocation of the hip: a severe injury with a poor prognosis, 223
Ischemic arm block
Patient perception of the ischemic arm block, 518

Joint infection
Arthroscopic treatment of septic arthritis. Surgical technique and results, 528
Journals
Publication rates for the scientific sessions of the OTA, 457
Juxta-articular fracture
Use of a hybrid external fixator for a severely comminuted juxta-articular fracture of the distal humerus, 439

Knee fixation
Temporary transarticular external fixation of the knee and ankle, 431
Kocher–Langenbeck approach
Trochanteric flip osteotomy for cranial extension and muscle protection in acetabular fracture fixation using a Kocher–Langenback approach, 387
K-wires
Intraoperative stimulus-evoked electromyographic monitoring for placement of iliosacral implants: an animal model, 85
Utilization of a partially threaded Kirschner wire in the treatment of femoral neck fractures, 320

Laser Doppler flowmetry
Femoral and cruciate blood flow after retrograde femoral reaming: a canine study using laser Doppler flowmetry, 253
Latex gloves
Outer gloves in orthopaedic procedures: a polyester/stainless steel wire weave glove liner compared with latex, 101
Lavage
High pressure pulsatile lavage irrigation of intraarticular fractures: effects on fracture healing, 460
High pressure pulsatile lavage of contaminated human tibiae: an in vitro study, 479
Leg injury
A comparison of acetylsalicylic acid with low-molecular-weight heparin for prophylaxis of deep-vein thrombosis in outpatients with injuries and immobilizing bandages of the lower limb, 372
Ilizarov external fixation in the management of bilateral, highly complex blast injuries of lower extremities: a report of two cases, 442
Infections in periarticular fractures of the lower extremity treated with tensioned wire hybrid fixators, 214
Treatment of type II, IIIA, and IIIB open fractures of the tibial shaft: a prospective comparison of unreamed interlocking intramedullary nails and half-pin external fixators, 1
Letters to editor
in response to article by Adam J. Starr, 370
in response to article by L. E. Dahners, 219
Limb elevation
Effects of limb elevation on abnormally increased intramuscular pressure, blood perfusion pressure, and foot sensation: an experimental study in humans, 343
Lisfranc fracture–dislocation
Variant of the Lisfranc fracture–dislocation: a case report and review of the literature, 366
Load
Comparison of mechanical loads produced by current intramedullary reamer systems, 531
Load transmission
Biomechanical evaluation of a low anterior wall fracture: correlation with the CT subchondral arc, 152
Consequences of transverse acetabular fracture malreduction on load transmission across the hip joint, 90
Locking screws
Neurologic and vascular structures at risk during anterior-posterior locking of retrograde femoral nails, 379
Long bone fracture
Capacitively coupled electrical stimulation treatment: results from patients with failed long bone fracture unions, 510
Loose bodies
Cardiac arrest as a result of intraabdominal extravasation of fluid during arthroscopic removal of a loose body from the hip joint of a patient with an acetabular fracture, 294
Lower limb injury
A comparison of acetylsalicylic acid with low-molecular-weight heparin for prophylaxis of deep-vein thrombosis in outpatients with injuries and immobilizing bandages of the lower limb, 372
Ilizarov external fixation in the management of bilateral, highly complex blast injuries of lower extremities: a report of two cases, 442
Infections in periarticular fractures of the lower extremity treated with tensioned wire hybrid fixators, 214

Malreduction
Biomechanical consequences of anterior column fracture of the acetabulum, 547
Consequences of transverse acetabular fracture malreduction on load transmission across the hip joint, 90
Malrotation angle
Mathematical precision in rotational corrective osteotomy of the femur, 360
Malrotation deformity
Prevention of malrotation deformity in femoral shaft fracture, 558

Malunion
Mathematical precision in rotational corrective osteotomy of the femur, 360
Mechanical complications
Mechanical complications associated with the use of the unreamed AO femoral intramedullary nail with spiral blade: first experiences with thirty-five consecutive cases, 186
Mechanical testing
Biomechanical comparison of fixation methods in transverse patella fractures, 356
Internal fixation of supracondylar femoral fractures: comparative biomechanical performance of the 95-degree blade plate and two retrograde nails, 259
Mechanical evaluation of a new minimum-contact plate for internal fracture fixation, 382
Medical thrombosis
A comparison of acetylsalicylic acid with low-molecular-weight heparin for prophylaxis of deep-vein thrombosis in outpatients with injuries and immobilizing bandages of the lower limb, 372
Metals
Enhancement of bone apposition to stainless steel cortical screws by surface modification using heat treatment: an experimental study, 504
Metastatic fracture
Mechanical complications associated with the use of the unreamed AO femoral intramedullary nail with spiral blade: first experiences with thirty-five consecutive cases, 186
Midclavicle fracture
Mid-clavicle fractures in adults: end result study after conservative treatment, 572
Minimally invasive procedure
Utilization of a partially threaded Kirschner wire in the treatment of femoral neck fractures, 320
Minimum-contact plate
Mechanical evaluation of a new minimum-contact plate for internal fracture fixation, 382
Monofilament wire
Biomechanical comparison of fixation methods in transverse patella fractures, 356
Moore prosthesis
Retrograde nailing of femoral fractures distal to a Moore prosthesis, 588
Mortality
Mortality in patients with bilateral femoral fractures, 315
Multidirectional dynamic conditions
Comparison of different methods of internal fixation of symphyseal disruptions under multidirectional dynamic conditions: an experimental analysis simulating gait conditions, 371
Muscle flaps
Treatment of chronic osteomyelitis of the acetabulum after hip joint replacement with a glutaeus maximus muscle flap, 528
Muscle protection
Trochanteric flip osteotomy for cranial extension and muscle protection in acetabular fracture fixation using a Kocher–Langenback approach, 387

Nailing
Avascular necrosis of the femoral head as a serious complication following femoral nailing in children and adolescents, 529
Cortical bone blood flow in loose and tight fitting locked unreamed intramedullary nailing: a canine segmental tibia fracture model, 127
Effects of degrees of reaming on healing of segmental fractures in rats, 192
Experimental study of distal interlocking of a solid tibial nail: radiation-independent distal aiming device (DAD) versus freehand technique (FHT), 373
Femur fractures in chest-injured patients: is reaming contraindicated?, 164
Intramedullary fixation of high subtrochanteric femoral fractures: a study comparing two implant designs, the gamma nail and the intramedullary hip screw, 249
Intramedullary nailing of humeral shaft fractures, 371
Length of operative procedures: reamed femoral intramedullary nailing performed with and without a fracture table, 485
Mechanical characteristics of eight femoral intramedullary nailing systems, 177
Nonunion of the humerus following intramedullary nailing treated by Ilizarov hybrid fixation, 138
Optimal location of a single distal interlocking screw in intramedullary nailing of distal third femoral shaft fractures, 267
Prevention of malrotation deformity in femoral shaft fracture, 558
Reamed intramedullary femoral nailing after induction of an "ARDS-like" state in sheep: effect on clinically applicable markers of pulmonary function, 169
The retrograde intramedullary nail: prospective experience in patients older than sixty-five years, 330
Retrograde intramedullary nailing of femoral diaphyseal fractures, 464
Retrograde nailing of femoral fractures distal to a Moore prosthesis, 588
Ulnar nerve palsy following fracture of the shaft of the humerus, 363
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: clinical results, 206
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: histologic correlation using a canine model, 200
Unreamed retrograde intramedullary nailing of fractures of the femoral shaft, 334
Vascular compromise and amputation after intramedullary nailing of a tibia fracture, 136
Nails
Dynamic hip screw with trochanteric stabilizing plate in the treatment of unstable proximal femoral fractures: a comparative study with the gamma nail and compression hip screw, 241
End caps for the intramedullary nail: a help or a hindrance?, 299
Geometrical properties and torsional fatigue life of a tibial interlocking intramedullary nail segment, 8
Internal fixation of supracondylar femoral fractures: comparative biomechanical performance of the 95-degree blade plate and two retrograde nails, 259
Intramedullary fixation of high subtrochanteric femoral fractures: a study comparing two implant designs, the gamma nail and the intramedullary hip screw, 249
A mechanical comparison of subtrochanteric femur fracture fixation, 324
Mechanical complications associated with the use of the unreamed AO femoral intramedullary nail with spiral blade: first experiences with thirty-five consecutive cases, 186
Neurologic and vascular structures at risk during anterior-posterior locking of retrograde femoral nails, 379
Removal of a broken Synthes proximal spiral blade, 190
The retrograde intramedullary nail: prospective experience in patients older than sixty-five years, 330
Treatment of type II, IIIA, and IIIB open fractures of the tibial shaft: a prospective comparison of unreamed interlocking intramedullary nails and half-pin external fixators, 1
Nebraska collar
Comparison of the Nebraska collar, a new prototype cervical immobilization collar, with three standard models, 425
Necrosis
Avascular necrosis of the femoral head as a serious complication following femoral nailing in children and adolescents, 529
Posttraumatic vascular impairment of the talus—is necrosis inevitable?, 529
Neurologic structures
Neurologic and vascular structures at risk during anterior-posterior locking of retrograde femoral nails, 379
Neurovascular damage
Neurologic and vascular structures at risk during anterior-posterior locking of retrograde femoral nails, 379
Nonunion
Capacitively coupled electrical stimulation treatment: results from patients with failed long bone fracture unions, 510
High pressure pulsatile lavage irrigation of intraarticular fractures: effects on fracture healing, 460
Nonunion of the humerus following intramedullary nailing treated by Ilizarov hybrid fixation, 138
Unstable femoral neck fractures in young adults: treatment with the AO 130-degree blade plate, 235

Obstruction
Bilateral ureteral obstruction and renal failure caused by massive retroperitoneal hematoma: is there a pelvic compartment syndrome analogous to abdominal compartment syndrome?, 553
Olive wire
Use of modified Ilizarov olive wires as pushing wires, 436
Open fracture
Ilizarov external fixation in the management of bilateral, highly complex blast injuries of lower extremities: a report of two cases, 442
Treatment of type II, IIIA, and IIIB open fractures of the tibial shaft: a prospective comparison of unreamed interlocking intramedullary nails and half-pin external fixators, 1
Orthopaedic surgeon
Meeting address: what is an orthopaedic surgeon in the twenty-first century?, 452
Orthopaedic Trauma Association
Publication rates for the scientific sessions of the OTA, 457
The scientific sessions at the OTA annual meeting, 456
Orthoses-immobilization
Comparison of the Nebraska collar, a new prototype cervical immobilization collar, with three standard models, 425
Ossification
Bone and cartilage formation in an experimental model of distraction osteogenesis, 111
Osteogenesis
Bone and cartilage formation in an experimental model of distraction osteogenesis, 111
Osteoinductive biomaterial
Use of an osteoinductive biomaterial (rhOP-1) in healing large segmental bone defects, 407
Osteomyelitis
Treatment of chronic osteomyelitis of the acetabulum after hip joint replacement with a glutaeus maximus muscle flap, 528
Osteonecrosis
Intraoperative assessment of femoral head vascularity after femoral neck fracture, 474
Osteoporosis
Nonunion of the humerus following intramedullary nailing treated by Ilizarov hybrid fixation, 138
Osteosynthesis
Conversion of osteosynthesis in war fractures, 529
Influence of primary plate-osteosynthesis of femur fractures on complications in multiple trauma patients with or without thoracic injuries, 528
The retrograde intramedullary nail: prospective experience in patients older than sixty-five years, 330
Screw osteosynthesis of displaced fractures of the radial condyle of the humerus in childhood. A long-term prospective study, 527
Triangular osteosynthesis of vertically unstable sacrum fractures: a new concept allowing early weight-bearing, 307
Osteotomy
Extensile exposure of comminuted patella fractures using a tibial tubercle osteotomy: results of a new technique, 351
Mathematical precision in rotational corrective osteotomy of the femur, 360
Trochanteric flip osteotomy for cranial extension and muscle protection in acetabular fracture fixation using a Kocher–Langenback approach, 387
Outcome
Femur fractures in chest-injured patients: is reaming contraindicated?, 164
Functional outcome of acromioclavicular joint injury in polytrauma patients, 159
Functional outcomes of "floating elbow" injuries in adult patients, 284
Mid-clavicle fractures in adults: end result study after conservative treatment, 572
Outcomes following repair of quadriceps tendon ruptures, 273
Patient rating of wrist pain and disability: a reliable and valid measurement tool, 577
Predictors of early failure of fixation in the treatment of displaced subcapital hip fractures, 230
Retrograde nailing of femoral fractures distal to a Moore prosthesis, 588
Outpatients
A comparison of acetylsalicylic acid with low-molecular-weight heparin for prophylaxis of deep-vein thrombosis in outpatients with injuries and immobilizing bandages of the lower limb, 372

Pain rating scale
Patient rating of wrist pain and disability: a reliable and valid measurement tool, 577

Patella fracture
Biomechanical comparison of fixation methods in transverse patella fractures, 356
Extensile exposure of comminuted patella fractures using a tibial tubercle osteotomy: results of a new technique, 351
Patellofemoral arthritis
Extensile exposure of comminuted patella fractures using a tibial tubercle osteotomy: results of a new technique, 351
Patient perception
Patient perception of the ischemic arm block, 518
Patient rating scale
Patient rating of wrist pain and disability: a reliable and valid measurement tool, 577
Patient satisfaction
Office removal of tibial external fixators: an evaluation of cost savings and patient satisfaction, 569
Patient survey
Patient rating of wrist pain and disability: a reliable and valid measurement tool, 577
Pediatrics
Skeletal traction versus external fixation for pediatric femoral shaft fractures: a comparison of hospital costs and charges, 563
Pelvic disruption
Long-term functional prognosis of posterior injuries in high-energy pelvic disruption, 145
Pelvic fracture
Rotational imaging of complex acetabular fractures, 59
Pelvic ring fractures
Triangular osteosynthesis of vertically unstable sacrum fractures: a new concept allowing early weight-bearing, 307
Pelvis
Bilateral ureteral obstruction and renal failure caused by massive retroperitoneal hematoma: is there a pelvic compartment syndrome analogous to abdominal compartment syndrome?, 553
Bladder incarceration in a traumatic symphysis pubis diastasis treated with external fixation: a case report and review of the literature, 64
Comparison of different methods of internal fixation of symphyseal disruptions under multidirectional dynamic conditions: an experimental analysis simulating gait conditions, 371
Percutaneous fixation
The Essex–Lopresti reduction for calcaneal fractures revisited, 469
Percutaneous fixation of the columns of the acetabulum: a new technique, 51
Perfusion pressure
Effects of limb elevation on abnormally increased intramuscular pressure, blood perfusion pressure, and foot sensation: an experimental study in humans, 343
Periarticular fractures
Infections in periarticular fractures of the lower extremity treated with tensioned wire hybrid fixators, 214
Pilon
Infections in periarticular fractures of the lower extremity treated with tensioned wire hybrid fixators, 214
Pilon fracture
Temporary transarticular external fixation of the knee and ankle, 431
Plate fixation
External fixation of tibial plafond fractures: is routine plating of the fibula necessary?, 16
Optimal position for plate fixation of complex fractures of the proximal radius: a cadaver study, 291
Plate-osteosynthesis
Influence of primary plate-osteosynthesis of femur fractures on complications in multiple trauma patients with or without thoracic injuries, 528
Polyester/stainless steel gloves
Outer gloves in orthopaedic procedures: a polyester/stainless steel wire weave glove liner compared with latex, 101
Polyglycolide
Operative treatment of displaced intra-articular fractures of the calcaneus using absorbable internal fixation: a prospective study of twenty-five fractures, 413
Polytrauma
Functional outcome of acromioclavicular joint injury in polytrauma patients, 159
Influence of primary plate-osteosynthesis of femur fractures on complications in multiple trauma patients with or without thoracic injuries, 528
Length of operative procedures: reamed femoral intramedullary nailing performed with and without a fracture table, 485
Posterior injury
Long-term functional prognosis of posterior injuries in high-energy pelvic disruption, 145
Pressure
Biomechanical evaluation of a low anterior wall fracture: correlation with the CT subchondral arc, 152
Intramedullary pressure increase for different commercial and experimental reaming systems: an experimental investigation, 540
Prevention
Prevention of malrotation deformity in femoral shaft fracture, 558
Prévot-nails
Intramedullary nailing of humeral shaft fractures, 371
Procollagen I C-terminal propeptide
Serology of collagen types I and III in normal healing of tibial shaft fractures, 122
Procollagen III N-terminal propeptide
Serology of collagen types I and III in normal healing of tibial shaft fractures, 122
Prognosis
Irreducible fracture–dislocation of the hip: a severe injury with a poor prognosis, 223
Long-term functional prognosis of posterior injuries in high-energy pelvic disruption, 145
Prognosis of proximal radius fractures in childhood, 527
Prophylaxis
A comparison of acetylsalicylic acid with low-molecular-weight heparin for prophylaxis of deep-vein thrombosis in outpatients with injuries and immobilizing bandages of the lower limb, 372
Prosthesis
Retrograde nailing of femoral fractures distal to a Moore prosthesis, 588
Proximal radius fracture
Prognosis of proximal radius fractures in childhood, 527
Pubic diastasis
Bladder incarceration in a traumatic symphysis pubis diastasis treated with external fixation: a case report and review of the literature, 64
Publication
Publication rates for the scientific sessions of the OTA, 457
Pulmonary complications
Treatment of femur fracture with associated head injury, 38
Pulmonary function
Reamed intramedullary femoral nailing after induction of an "ARDS-like" state in sheep: effect on clinically applicable markers of pulmonary function, 169
Pulmonary outcomes
Femur fractures in chest-injured patients: is reaming contraindicated?, 164
Pulsatile lavage
High pressure pulsatile lavage irrigation of intraarticular fractures: effects on fracture healing, 460
High pressure pulsatile lavage of contaminated human tibiae: an in vitro study, 479
Pushing wires
Use of modified Ilizarov olive wires as pushing wires, 436

Quadriceps tendon rupture
Outcomes following repair of quadriceps tendon ruptures, 273

Radial condyle fracture
Screw osteosynthesis of displaced fractures of the radial condyle of the humerus in childhood. A long-term prospective study, 527
Radial head fractures
Prognosis of proximal radius fractures in childhood, 527
Radial nerve palsy
Intramedullary nailing of humeral shaft fractures, 371
Radiation exposure
Experimental study of distal interlocking of a solid tibial nail: radiation-independent distal aiming device (DAD) versus freehand technique (FHT), 373
Radiation-independent distal aiming device
Experimental study of distal interlocking of a solid tibial nail: radiation-independent distal aiming device (DAD) versus freehand technique (FHT), 373
Radiography
Comparison of the Nebraska collar, a new prototype cervical immobilization collar, with three standard models, 425
Radiolucent table
Length of operative procedures: reamed femoral intramedullary nailing performed with and without a fracture table, 485
Radioulnar joint dislocation
Dislocation of the distal radioulnar joint associated with an intraarticular fracture of the ulnar head: report of two cases, 68
Radius
Optimal position for plate fixation of complex fractures of the proximal radius: a cadaver study, 291
Radius fracture
Biomechanical evaluation of distal radius fracture stability, 46
Prognosis of proximal radius fractures in childhood, 527
Reamed intramedullary nailing
Length of operative procedures: reamed femoral intramedullary nailing performed with and without a fracture table, 485
Reamer design
Intramedullary pressure increase for different commercial and experimental reaming systems: an experimental investigation, 540
Reaming
Comparison of mechanical loads produced by current intramedullary reamer systems, 531
Effect of limited and standard reaming on cortical bone blood flow and early strength of union following segmental fracture, 400
Effects of degrees of reaming on healing of segmental fractures in rats, 192
Femoral and cruciate blood flow after retrograde femoral reaming: a canine study using laser Doppler flowmetry, 253
Femur fractures in chest-injured patients: is reaming contraindicated?, 164
Intramedullary pressure increase for different commercial and experimental reaming systems: an experimental investigation, 540
Reamed intramedullary femoral nailing after induction of an "ARDS-like" state in sheep: effect on clinically applicable markers of pulmonary function, 169
Reconstruction nails
A mechanical comparison of subtrochanteric femur fracture fixation, 324
Reduction
The Essex–Lopresti reduction for calcaneal fractures revisited, 469
Long-term functional prognosis of posterior injuries in high-energy pelvic disruption, 145
Regional anesthesia
Patient perception of the ischemic arm block, 518
Rehabilitation
Functional outcomes of "floating elbow" injuries in adult patients, 284
Ilizarov external fixation in the management of bilateral, highly complex blast injuries of lower extremities: a report of two cases, 442
Renal failure
Bilateral ureteral obstruction and renal failure caused by massive retroperitoneal hematoma: is there a pelvic compartment syndrome analogous to abdominal compartment syndrome?, 553
Research
Publication rates for the scientific sessions of the OTA, 457
Retrograde femoral reaming
Femoral and cruciate blood flow after retrograde femoral reaming: a canine study using laser Doppler flowmetry, 253
Retrograde intramedullary nailing
Retrograde intramedullary nailing of femoral diaphyseal fractures, 464
Retrograde intramedullary nails
Neurologic and vascular structures at risk during anterior-posterior locking of retrograde femoral nails, 379
The retrograde intramedullary nail: prospective experience in patients older than sixty-five years, 330
Retrograde nailing
Retrograde nailing of femoral fractures distal to a Moore prosthesis, 588
Unreamed retrograde intramedullary nailing of fractures of the femoral shaft, 334
Retrograde nails
Internal fixation of supracondylar femoral fractures: comparative biomechanical performance of the 95-degree blade plate and two retrograde nails, 259

Retroperitoneal hematoma
Bilateral ureteral obstruction and renal failure caused by massive retroperitoneal hematoma: is there a pelvic compartment syndrome analogous to abdominal compartment syndrome?, 553
rhOP-1
Use of an osteoinductive biomaterial (rhOP-1) in healing large segmental bone defects, 407
Rigidity testing
Mechanical characteristics of eight femoral intramedullary nailing systems, 177
Rotational corrective osteotomy
Mathematical precision in rotational corrective osteotomy of the femur, 360
Rotational imaging
Rotational imaging of complex acetabular fractures, 59
Rotational malunion
Mathematical precision in rotational corrective osteotomy of the femur, 360

Sacroiliac
Long-term functional prognosis of posterior injuries in high-energy pelvic disruption, 145
Sacrum
Long-term functional prognosis of posterior injuries in high-energy pelvic disruption, 145
Sacrum fracture
Triangular osteosynthesis of vertically unstable sacrum fractures: a new concept allowing early weight-bearing, 307
Salvage procedure
Nonunion of the humerus following intramedullary nailing treated by Ilizarov hybrid fixation, 138
Scientific research
Publication rates for the scientific sessions of the OTA, 457
Screw osteosynthesis
Screw osteosynthesis of displaced fractures of the radial condyle of the humerus in childhood. A long-term prospective study, 527
Screws
Clinical results using the trochanter stabilizing plate (TSP): the modular extension of the dynamic hip screw (DHS) for internal fixation of selected unstable intertrochanteric fractures, 392
Dynamic hip screw with trochanteric stabilizing plate in the treatment of unstable proximal femoral fractures: a comparative study with the gamma nail and compression hip screw, 241
End caps for the intramedullary nail: a help or a hindrance?, 299
Enhancement of bone apposition to stainless steel cortical screws by surface modification using heat treatment: an experimental study, 504
Experimental study of distal interlocking of a solid tibial nail: radiation-independent distal aiming device (DAD) versus freehand technique (FHT), 373
Intramedullary fixation of high subtrochanteric femoral fractures: a study comparing two implant designs, the gamma nail and the intramedullary hip screw, 249
Intraoperative stimulus-evoked electromyographic monitoring for placement of iliosacral implants: an animal model, 85
Neurologic and vascular structures at risk during anterior-posterior locking of retrograde femoral nails, 379
Optimal location of a single distal interlocking screw in intramedullary nailing of distal third femoral shaft fractures, 267
Percutaneous fixation of the columns of the acetabulum: a new technique, 51
Predicting the mechanical outcome of femoral neck fractures fixed with cancellous screws: an in vivo study, 27
Screw osteosynthesis of displaced fractures of the radial condyle of the humerus in childhood. A long-term prospective study, 527
Sealing screw
End caps for the intramedullary nail: a help or a hindrance?, 299
Segmental bone defects
Use of an osteoinductive biomaterial (rhOP-1) in healing large segmental bone defects, 407
Segmental fractures
Effects of degrees of reaming on healing of segmental fractures in rats, 192
Segmental tibia fracture
Cortical bone blood flow in loose and tight fitting locked unreamed intramedullary nailing: a canine segmental tibia fracture model, 127
Effect of limited and standard reaming on cortical bone blood flow and early strength of union following segmental fracture, 400
Seidel nailing
Nonunion of the humerus following intramedullary nailing treated by Ilizarov hybrid fixation, 138
Serology
Serology of collagen types I and III in normal healing of tibial shaft fractures, 122
Shock
The contribution of soft-tissue trauma and/or bone fracture to depressed immunity following hemorrhagic shock in an experimental setting, 371
Shoulder dislocation
Acromion fracture associated with posterior shoulder dislocation, 521
Skating injury
An irreducible distal fibula dislocation while in-line skating, 364
Skeletal traction
Skeletal traction versus external fixation for pediatric femoral shaft fractures: a comparison of hospital costs and charges, 563
Skin protection
Protection of the skin during cast removal, 435
Soft-tissue trauma
The contribution of soft-tissue trauma and/or bone fracture to depressed immunity following hemorrhagic shock in an experimental setting, 371
Spinal canal compromise
The efficiency of ultrasound guided spinal fracture reposition, 527
Spinal cord injury
Low-velocity gunshot injuries of the spine with abdominal viscus trauma, 514
Spinal fracture
The efficiency of ultrasound guided spinal fracture reposition, 527
Spinal trauma
Low-velocity gunshot injuries of the spine with abdominal viscus trauma, 514
Spiral blade
Mechanical complications associated with the use of the unreamed AO femoral intramedullary nail with spiral blade: first experiences with thirty-five consecutive cases, 186
Removal of a broken Synthes proximal spiral blade, 190
Spontaneous correction
Prognosis of proximal radius fractures in childhood, 527
Stabilization
Triangular osteosynthesis of vertically unstable sacrum fractures: a new concept allowing early weight-bearing, 307
Stabilizing plate
Dynamic hip screw with trochanteric stabilizing plate in the treatment of unstable proximal femoral fractures: a comparative study with the gamma nail and compression hip screw, 241
Staphylococcus aureus
High pressure pulsatile lavage of contaminated human tibiae: an in vitro study, 479
Static interlocked nailing
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: clinical results, 206
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: histologic correlation using a canine model, 200
Stimulus-evoked electromyography
Intraoperative stimulus-evoked electromyographic monitoring for placement of iliosacral implants: an animal model, 85
Strength
Effect of limited and standard reaming on cortical bone blood flow and early strength of union following segmental fracture, 400
Mechanical characteristics of eight femoral intramedullary nailing systems, 177
Outcomes following repair of quadriceps tendon ruptures, 273
Subcapital hip fracture
Predictors of early failure of fixation in the treatment of displaced subcapital hip fractures, 230
Subtrochanteric fracture
Intramedullary fixation of high subtrochanteric femoral fractures: a study comparing two implant designs, the gamma nail and the intramedullary hip screw, 249
A mechanical comparison of subtrochanteric femur fracture fixation, 324
Mechanical complications associated with the use of the unreamed AO femoral intramedullary nail with spiral blade: first experiences with thirty-five consecutive cases, 186
Removal of a broken Synthes proximal spiral blade, 190
Supracondylar fixation
Internal fixation of supracondylar femoral fractures: comparative biomechanical performance of the 95-degree blade plate and two retrograde nails, 259
Supracondylar fracture
Internal fixation of supracondylar femoral fractures: comparative biomechanical performance of the 95-degree blade plate and two retrograde nails, 259
Surgery
Comparison of cloth gloves used in orthopaedic surgery: a clinical and experimental evaluation, 106
Operative treatment of displaced intra-articular fractures of the calcaneus using absorbable internal fixation: a prospective study of twenty-five fractures, 413
Outer gloves in orthopaedic procedures: a polyester/stainless steel wire weave glove liner compared with latex, 101
Predictors of early failure of fixation in the treatment of displaced subcapital hip fractures, 230
Surgical approaches
Effects of surgical approaches for acetabular fractures with associated gluteal vascular injury, 78
Trochanteric flip osteotomy for cranial extension and muscle protection in acetabular fracture fixation using a Kocher–Langenback approach, 387
Surgical gloves
Comparison of cloth gloves used in orthopaedic surgery: a clinical and experimental evaluation, 106
Outer gloves in orthopaedic procedures: a polyester/stainless steel wire weave glove liner compared with latex, 101
Surgical methods
Comparison of different methods of internal fixation of symphyseal disruptions under multidirectional dynamic conditions: an experimental analysis simulating gait conditions, 371
Surgical procedures
Length of operative procedures: reamed femoral intramedullary nailing performed with and without a fracture table, 485
Utilization of a partially threaded Kirschner wire in the treatment of femoral neck fractures, 320
Surgical techniques
Arthroscopic treatment of septic arthritis. Surgical technique and results, 528
Extensile exposure of comminuted patella fractures using a tibial tubercle osteotomy: results of a new technique, 351
Percutaneous fixation of the columns of the acetabulum: a new technique, 51
Secondary wound closure following fasciotomy for acute compartment syndrome increases intramuscular pressure, 117
Surgical wounds
Efficacy of surgical wound drainage in orthopaedic trauma patients: a randomized prospective trial, 348
Symphyseal disruptions
Comparison of different methods of internal fixation of symphyseal disruptions under multidirectional dynamic conditions: an experimental analysis simulating gait conditions, 371
Symphysis pubis diastasis
Bladder incarceration in a traumatic symphysis pubis diastasis treated with external fixation: a case report and review of the literature, 64
Synthes proximal spiral blade
Removal of a broken Synthes proximal spiral blade, 190

Talar fracture
Posttraumatic vascular impairment of the talus—is necrosis inevitable?, 529
Tarsometatarsal joint
Variant of the Lisfranc fracture–dislocation: a case report and review of the literature, 366
Tendon rupture
Outcomes following repair of quadriceps tendon ruptures, 273
Tension band
Biomechanical comparison of fixation methods in transverse patella fractures, 356

Tensioned wire fixator
Infections in periarticular fractures of the lower extremity treated with tensioned wire hybrid fixators, 214
Thoracic trauma
Influence of primary plate-osteosynthesis of femur fractures on complications in multiple trauma patients with or without thoracic injuries, 528
Reamed intramedullary femoral nailing after induction of an "ARDS-like" state in sheep: effect on clinically applicable markers of pulmonary function, 169
Thrombosis
A comparison of acetylsalicylic acid with low-molecular-weight heparin for prophylaxis of deep-vein thrombosis in outpatients with injuries and immobilizing bandages of the lower limb, 372
Tibia
Geometrical properties and torsional fatigue life of a tibial interlocking intramedullary nail segment, 8
High pressure pulsatile lavage of contaminated human tibiae: an in vitro study, 479
Serology of collagen types I and III in normal healing of tibial shaft fractures, 122
Tibia fracture
Cortical bone blood flow in loose and tight fitting locked unreamed intramedullary nailing: a canine segmental tibia fracture model, 127
Effect of limited and standard reaming on cortical bone blood flow and early strength of union following segmental fracture, 400
Experimental study of distal interlocking of a solid tibial nail: radiation-independent distal aiming device (DAD) versus freehand technique (FHT), 373
External fixation of tibial plafond fractures: is routine plating of the fibula necessary?, 16
Treatment of type II, IIIA, and IIIB open fractures of the tibial shaft: a prospective comparison of unreamed interlocking intramedullary nails and half-pin external fixators, 1
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: clinical results, 206
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: histologic correlation using a canine model, 200
Use of modified Ilizarov olive wires as pushing wires, 436
Vascular compromise and amputation after intramedullary nailing of a tibia fracture, 136
Tibial external fixators
Office removal of tibial external fixators: an evaluation of cost savings and patient satisfaction, 569
Tibial plateau
Infections in periarticular fractures of the lower extremity treated with tensioned wire hybrid fixators, 214
Tibial plateau fracture
Biomechanical comparison of hybrid external fixators, 496
Temporary transarticular external fixation of the knee and ankle, 431
Tibial shaft fracture
Serology of collagen types I and III in normal healing of tibial shaft fractures, 122
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: clinical results, 206
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: histologic correlation using a canine model, 200
Tibial tubercle osteotomy
Extensile exposure of comminuted patella fractures using a tibial tubercle osteotomy: results of a new technique, 351
Torque
Comparison of mechanical loads produced by current intramedullary reamer systems, 531
Torsion femoral deformity
Mathematical precision in rotational corrective osteotomy of the femur, 360
Torsional fatigue
Geometrical properties and torsional fatigue life of a tibial interlocking intramedullary nail segment, 8
Traction
Skeletal traction versus external fixation for pediatric femoral shaft fractures: a comparison of hospital costs and charges, 563
Traction table
Inferior epigastric artery avulsion: a fracture table complication, 587
Transarticular external fixation
Temporary transarticular external fixation of the knee and ankle, 431
Trauma
The contribution of soft-tissue trauma and/or bone fracture to depressed immunity following hemorrhagic shock in an experimental setting, 371
Efficacy of surgical wound drainage in orthopaedic trauma patients: a randomized prospective trial, 348
Fracture site motion with Ilizarov and "hybrid" external fixation, 21
Long-term functional prognosis of posterior injuries in high-energy pelvic disruption, 145
Low-velocity gunshot injuries of the spine with abdominal viscus trauma, 514
Mortality in patients with bilateral femoral fractures, 315
Trauma care in Europe before and after John Border: the evolution in trauma management at the University of Hannover, 301
Triangular osteosynthesis
Triangular osteosynthesis of vertically unstable sacrum fractures: a new concept allowing early weight-bearing, 307
Trochanter stabilizing plate
Clinical results using the trochanter stabilizing plate (TSP): the modular extension of the dynamic hip screw (DHS) for internal fixation of selected unstable intertrochanteric fractures, 392
Trochanteric flip osteotomy
Trochanteric flip osteotomy for cranial extension and muscle protection in acetabular fracture fixation using a Kocher–Langenback approach, 387
Trochanteric fracture
Dynamic hip screw with trochanteric stabilizing plate in the treatment of unstable proximal femoral fractures: a comparative study with the gamma nail and compression hip screw, 241
Trochanteric stabilizing plate
Dynamic hip screw with trochanteric stabilizing plate in the treatment of unstable proximal femoral fractures: a comparative study with the gamma nail and compression hip screw, 241

Ulnar head
Dislocation of the distal radioulnar joint associated with an intraarticular fracture of the ulnar head: report of two cases, 68
Ulnar nerve palsy
Ulnar nerve palsy following fracture of the shaft of the humerus, 363
Ulnar shaft fracture
Isolated ulnar shaft fractures treated with functional braces, 420
Ultrasound
The efficiency of ultrasound guided spinal fracture reposition, 527
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: clinical results, 206
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: histologic correlation using a canine model, 200
Union
Effect of limited and standard reaming on cortical bone blood flow and early strength of union following segmental fracture, 400
Unreamed femoral nail
Mechanical complications associated with the use of the unreamed AO femoral intramedullary nail with spiral blade: first experiences with thirty-five consecutive cases, 186
Unreamed nailing
Cortical bone blood flow in loose and tight fitting locked unreamed intramedullary nailing: a canine segmental tibia fracture model, 127
Unreamed retrograde intramedullary nailing
Unreamed retrograde intramedullary nailing of fractures of the femoral shaft, 334
Unreamed tibial nailing
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: clinical results, 206
Ultrasound for the early diagnosis of tibial fracture healing after static interlocked nailing without reaming: histologic correlation using a canine model, 200
Unstable fracture
Clinical results using the trochanter stabilizing plate (TSP): the modular extension of the dynamic hip screw (DHS) for internal fixation of selected unstable intertrochanteric fractures, 392
Dynamic hip screw with trochanteric stabilizing plate in the treatment of unstable proximal femoral fractures: a comparative study with the gamma nail and compression hip screw, 241
Ureteral obstruction
Bilateral ureteral obstruction and renal failure caused by massive retroperitoneal hematoma: is there a pelvic compartment syndrome analogous to abdominal compartment syndrome?, 553

Vascular compromise
Vascular compromise and amputation after intramedullary nailing of a tibia fracture, 136
Vascular injury
Effects of surgical approaches for acetabular fractures with associated gluteal vascular injury, 78
Posttraumatic vascular impairment of the talus—is necrosis inevitable?, 529
Vascular structures
Neurologic and vascular structures at risk during anterior-posterior locking of retrograde femoral nails, 379
Vascularity
Intraoperative assessment of femoral head vascularity after femoral neck fracture, 474
Venous obstruction
Effects of limb elevation on abnormally increased intramuscular pressure, blood perfusion pressure, and foot sensation: an experimental study in humans, 343
Vertical stabilization
Triangular osteosynthesis of vertically unstable sacrum fractures: a new concept allowing early weight-bearing, 307
Visceral trauma
Low-velocity gunshot injuries of the spine with abdominal viscus trauma, 514
Visual analog scale
Office removal of tibial external fixators: an evaluation of cost savings and patient satisfaction, 569
Volar carpometacarpal dislocation
Volar dislocation of multiple carpometacarpal joints: report of four cases, 523

War injury
Conversion of osteosynthesis in war fractures, 529
Ilizarov external fixation in the management of bilateral, highly complex blast injuries of lower extremities: a report of two cases, 442
Weight-bearing
Triangular osteosynthesis of vertically unstable sacrum fractures: a new concept allowing early weight-bearing, 307
Wound closure
Secondary wound closure following fasciotomy for acute compartment syndrome increases intramuscular pressure, 117
Wound contamination
High pressure pulsatile lavage irrigation of intraarticular fractures: effects on fracture healing, 460
Wound drainage
Efficacy of surgical wound drainage in orthopaedic trauma patients: a randomized prospective trial, 348
Wrist
Patient rating of wrist pain and disability: a reliable and valid measurement tool, 577
